In 1938, Roy Roberts came up with an idea of how to install wall-to-wall carpet without using the traditional method of using tacks around the edges of the room. Roy Roberts, Hugh Livie and Ken Bishop each put up $1,000 and invested in some plywood, a Sears-Roebuck table saw, a keg of shingle nails, pliers, hammers and similar essentials. And so, the story of ROBERTS and the ROBERTS carpet gripper was born.

While traveling around the country selling and training installers on how to use ‘tackless carpet strip’, the three partners gained tremendous knowledge about carpet installation. It gave them an opportunity to see firsthand what other materials and products might be necessary to help modernize carpet installation techniques for the whole industry. There was an obvious need for modern tools and techniques. The partners obtained national sales rights for the most modern knee-kickers and extension stretchers they could find. They then acquired manufacturing rights and made improvements under the ROBERTS label. The company held early patents on knee kickers, carpet seaming irons, loop pile carpet cutters, carpet knives, a carpet binding machine and tack strip. As they developed new tools and new ways to install flooring, they continued to educate carpet installers on newer methods of installations.

The carpet industry had also just begun to use liquid latex for carpet seaming and repair, so the newly formed company developed a new latex formula of its own and labeled it Rubber-edge, laying the groundwork for today’s thriving adhesives division of Roberts Consolidated Industries, Inc.

Now, 80 years later and with locations and product lines known throughout the world, generations of installers have grown up using ROBERTS adhesives, carpet installation tools and accessories. Worldwide, the ROBERTS name continues to be the manufacturer of choice for installation professionals who demand quality and reliability.
TACK STRIP
EagleGrip Tack Strip

- 1” extra wide premium tack strip
- Made from premium Arctic Birch for the strongest, flattest tack strip
- Most widely used type of carpet tack strips
- 68 pins for firm hold
- Front and back rows of pins are moved farther apart for extra strength and easier hooking with stiff carpets or thick cushion
- Use during residential and commercial installations when extra holding power is desired
- Manufactured using Carb Phase II and TSCA Title VI compliant materials
- 400 feet per case

Pre-Nailed

EG-320 Pre-Nailed Wood (Regular 3/4” ring shank nail)
EG-321 Pre-Nailed Wood (Heavy Duty 1” ring shank nail)

Aluminum Carpet Strip

ROBERTS

- Constructed of 100% high strength aluminum, will not rust or rot
- Perfect for installing carpet in areas where water damage, termite damage, and other types of damage to plywood tack strips are risks
- For high traffic areas such as entry ways and doorways where tall pins may extend through the face of the carpet
- Can be installed with any carpet, but is particularly useful with low-pile carpet
- 1/8" pins (shorter than J-Pin), angled toward the wall for easier hooking and a stronger hold
- 1" wide, over 240 pins per 4 foot length
- Contains nail holes every 3" for easy nailing, as well as a groove for an adhesive bead if nailing is not feasible

HS-722 Aluminum Carpet Strip (1" wide x 4 feet long) (40 ft per case)

Professional 2” Strip Cutter

ROBERTS

- Long jaws cut all strip, including architectural strip
- Powerful cutting force - 8 to 1 leverage
- Rugged, forged steel construction
- Blade storage in handle

10-108 Professional 2" Strip Cutter (3/cs)
Uses replacement blades: 10-439 (see page 28)

Multi-Use Trim Shears

QEP

- Easily cuts quarter round, tile trim, PVC piping, tackstrip and other light materials
- Makes fast angle cuts in wood quarter round, tile trim, pvc piping, tackstrip and other materials
- Eliminates the need for a chop or miter saw
- Attached miter guide for precise cutting of angles
- Pre-notched guide at 45°, 60°, 75°, 90°, 105° and 120°

### Anchoring Nail

#### Regular Duty
- 12 Gauge x 11/16" Hardened Steel
  - Regular duty for newer concrete floors
  - Machine quality
  - Quality high carbon hardened steel

#### Heavy Duty
- 10 Gauge x 5/8" Hardened Steel
  - Heavy duty for hard, dense concrete
  - Professional quality
  - Quality high carbon hardened steel

#### Specialty Products
- **Standard**
  - No Anchoring Nail
    - Works on all floor types
    - Installed with tackstrip adhesive or fasteners

- **Elasticel**
  - 12 Gauge x 1-1/4" Spiral Shank
    - Medium Duty
    - For light weight Acoustical / Elasticel concrete floors
    - Quality high carbon hardened steel
    - Professional Quality Spiral Shank

- **Dual Purpose**
  - 12 Gauge x 11/16" Ring Shank
    - Heavy Duty
    - For both wood and concrete floors
    - Quality high carbon hardened steel
    - Professional Quality with added rings

### Pin Nail

- **C-Pin**
  - Used when installing carpet with rough or thick backings.

- **E-Pin**
  - Industry Standard
  - Used in 95% of all carpet installations.

- **D-Pin**
  - Used for carpets with short, dense pile and thinner backing to avoid pins showing through the carpet face.

- **J-Pin**
  - Used for very thin, specialty carpets such as Velours, Velvets with extremely thin backing. Strongest pin height available.
10 Gauge Concrete Nails

- A heavy 10-gauge shank nail
- For use on extremely hard or “aged” concrete where 12 gauge could bend or break

11 Gauge Ring Shank Wood Nails

- Ring shank nails provide better holding power in all wood products than smooth shank nails of the same length
- As the nail is driven the wood grabs and grips the barbed rings which increases the hold
- The 1-1/2” nail is used to install carpet strip in heavy duty installations

All nails are made in Taiwan to Roberts’ specifications.
Lath nails are economically priced general construction nails that are also used by carpet installers. Lath nails are thin 15 gauge and have small heads.

- Oval heads are designed for “flush” fit when used to anchor carpet bar and stair nosing.
- As the spiral shank is driven into the substrate it forms a screw shaped hole for better grip and hold, which prevents the nail from loosening and prevents damage to the substrate.

NWFA recommends that you follow the flooring manufacturers' installation guidelines regarding the tool and fastener to be used on your floors. The recommendations in this catalog are intended to be a guide to assist the user in placing the flooring fastener in the correct position, protect the pre finished surface and to obtain optimum installation results using industry standard guidelines. Always test the flooring for nail placement before full installation.

## About California Proposition 65

Proposition 65 is a California regulatory law that requires businesses to notify California consumers about specific chemicals in the products they purchase so they can make informed decisions about protecting themselves from exposure to these chemicals. This law requires companies to properly label products that contain chemical(s) above certain threshold levels.

As part of Q.E.P. Co. Inc.’s continued best business practice and compliance program, we comply with Proposition 65 warning requirements and provide product-associated warnings. We are dedicated to meeting consumer product safety requirements applicable to our products and strive to provide high quality and safe products.

For more information on California Proposition 65, go to www.P65Warnings.ca.gov.
