

4-in-1 Expansion Joint Spacers

1/4" Vinyl	3/8" Laminate	1/2" Engineered Wood	1" Thresholds
----------------------	-------------------------	--------------------------------	-------------------------

US Patent No. 12,024,897

DURABLE

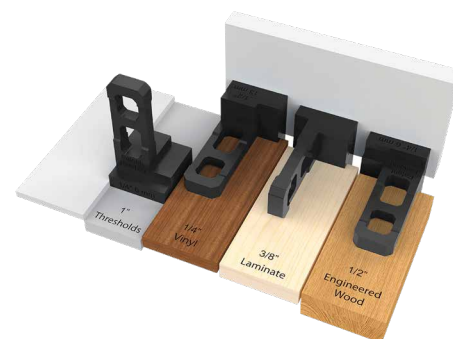

Constructed of polypropylene for durability

VERSATILE

For vinyl, laminate and hardwood floors

SELF-BRACING

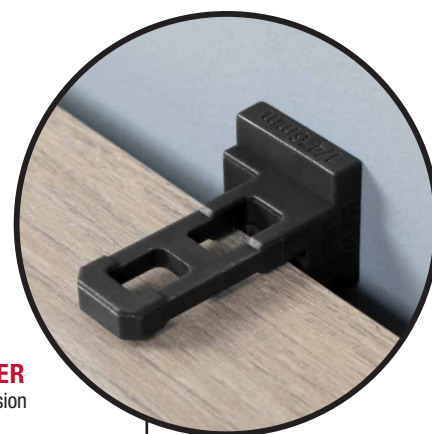

Remains in place throughout installation and won't tip over

**REUSABLE FOR
YOUR NEXT
INSTALLATION PROJECT**

CREATES A PERIMETER

Spaces 1/4", 3/8" and 1/2" expansion gaps around the room and 1" thresholds between rooms

PRODUCT
INFORMATION

ROBERTS® patented 4-in-1 Expansion Joint Spacer lies flat on the flooring and won't tip over while installing floating/glue-down vinyl, laminate or hardwood flooring. Not only do they create 1/4", 3/8" and 1/2" gaps, but also can be used for spacing when installing Thresholds. Expansion joints create a perimeter between your flooring and walls, and help protect your floors from damage during expansion and contraction in room temperature fluctuations.
