In 1938, the carpet industry had just begun to use liquid latex for carpet seaming and repair. The newly formed ROBERTS Company developed a new latex formula of its own and labeled it Rubber-edge, laying the groundwork for today’s thriving Adhesives Division of Roberts Consolidated Industries, Inc.

ROBERTS continued with innovations in the industry and pioneered the Double Bond Carpet Installation method which is now a recognized standard that has stood the test of time. ROBERTS has been a leader in the manufacturing of adhesives ever since, producing its first solvent-free adhesive in the 1980’s and continuing to develop environmentally friendly products.

With locations and product lines known and used throughout the world, ROBERTS has been recognized as the premier brand of adhesives, carpet installation tools and accessories. Worldwide, the ROBERTS name continues to be the manufacturer of choice for installation professionals who demand quality and reliability.

Supporting Professional Installers - Since 1938 -
ADHESIVE SOLUTIONS

ROBERTS® Moisture Control Adhesives
Enhanced, superior-grade adhesives made to withstand up to 10 lbs. moisture vapor emission rates (MVER) and up to 90% relative humidity (RH), over newly poured concrete with declining values. This improvement simplifies the moisture mitigation process:
SAVE TIME. SAVE STEPS. SAVE MONEY.

ROBERTS takes its environmental responsibilities seriously and actively participates with governing agencies and organizations to establish the highest standards for environmentally conscientious products. ROBERTS continues to minimize the environmental impact of our products by ongoing improvement of product technologies, manufacturing and distribution methods.

GoldGuard® Antimicrobial Technology
The ROBERTS two-tier antimicrobial protection system for both the wet and dry state inhibits the growth of mold, mildew and odor causing bacteria.

LEED® v4 Qualified Adhesives
Many of our adhesives contribute one or more points in the LEED rating system. The U.S. Green Building Council’s LEED Green Building Program is the preeminent program for the design, construction, maintenance and operations of high-performance green buildings. Learn more at usgbc.org/LEED.

CRI Green Label +Plus®
These adhesives have been rigorously tested and meet the most stringent criteria for low chemical emissions and are among the lowest emitting VOC products in the market.

ROBERTS Enviro Friendly
The Green “e” Logo on a product, indicates an environmentally conscious product manufactured by a company that is committed to protect and sustain our environment.

3300 Multipurpose Adhesive

**SUPERIOR**

- MOISTURE CONTROL – Up to 8 lbs. MVER / 85% RH
- NFPA Class A / UBC Class 1 Fire Ratings
- Aggressive grab for reduced bubbling and curling
- Excellent rebond properties
- Ideal for direct and double bond installations
- Traffic – Heavy commercial

ROBERTS 3300 is a superior performing, high solids multipurpose adhesive formulated for the installation of hard-to-bond commercial carpet. Plus most types of felt-backed, fiber-backed and paper-backed resilient floor coverings. VOC: < 1 g/L.

**Open Time:** Up to 30 min.  **Working Time:** Up to 60 min.

### 3900 Carpet Adhesive
**Preferred**
- Great up front tack and strong bond
- Holds stiff, rigid carpet backings
- Traffic - Heavy residential / Moderate commercial

ROBERTS 3900 is a high performing direct glue down carpet adhesive recommended for light to heavy traffic. It is a rapid grabbing adhesive to assist in holding stiff carpets in place during installation and is specifically designed with the desired characteristics for commercial carpet installations. VOC: < 1 g/L.

**Open Time:** Up to 25 min.  **Working Time:** Up to 45 min.

6300 Pressure Sensitive Adhesive

**SUPERIOR**

- MOISTURE CONTROL – Up to 10 lbs. MVER / 90% RH
- Releasable or permanent installations
- High shear strength and exceptional plasticizer migration resistance
- Traffic - Heavy commercial

ROBERTS 6300 is a high performance pressure sensitive adhesive which may be used to install carpet tiles, commercial carpet cushion, fiberglass reinforced sheet vinyl, luxury vinyl tiles and heterogeneous sheet vinyl and tile. This product dries quickly and offers a high shear strength making it the adhesive of choice for commercial installations where performance is key. VOC: 10 g/L.

**PERMANENT (Wet-set Method)**
- Open Time: Up to 20 min.
- Working Time: Up to 40 min.

**RELEASABLE (Tack-set Method)**
- Open Time: Up to 45 min.

6700 Indoor/Outdoor Carpet Adhesive

**SUPERIOR**

- Solvent-free, non-flammable, low VOC
- Excellent moisture resistance when cured
- Ideal for decks, sunrooms and basements

ROBERTS 6700 is a solvent-free adhesive designed for the exterior or interior installation of indoor/outdoor carpet. This adhesive is ideal for interior patios or sunrooms, as well as basements. VOC: < 1 g/L.

**Open Time:** Up to 30 min.  **Working Time:** Up to 60 min.
4002 Latex Carpet Pad Adhesive

**PREFERRED**
- Prevents pad movement for trouble-free installations
- Permanent bond to porous and non-porous substrates
- Fast grabbing and quick drying

ROBERTS 4002 is a solvent-free, latex-based, enviro-friendly carpet pad adhesive, developed to quickly bond carpet pads to subfloors in stretch-in carpet installations. It provides a permanent bond to porous and non-porous substrates. VOC: < 1 g/L.

**Coverage:** Up to 700 lineal feet per gallon, depending on application method

**Open Time:** Up to 15 min.  **Working Time:** Up to 45 min.

## Resilient Adhesives

### 2350 HARD-SET Resilient Flooring Adhesive

**Superior**
- MOISTURE CONTROL – Up to 8 lbs. MVER / 85% RH
- Tenacious up front tack; cures to permanent hard-set bond
- Resists indentations from heavy rolling loads
- Excellent trowelability and flexibility for multiple flooring types
- Traffic - Heavy commercial

RoberTs 2350 HARD-SET is an exceptional performing acrylic formula, specifically designed to offer tenacious up-front pressure sensitive performance and cures to a permanent hard-setting bond. Excellent for use on installations requiring resistance to indentations from heavy point and rolling loads. VOC: < 1 g/L.

**Open Time:** Up to 15 min.  **Working Time:** Up to 60 min.

- Medium Nap Roller
**ROBERTS 7000** is a premium, high solids adhesive designed to be a quick, easy, one-step installation process for luxury vinyl tile, luxury vinyl plank, vinyl composition tile, vinyl-backed carpet tile, and fiberglass-backed tile in residential and commercial applications. Spray installation method uses less adhesive than typical trowel applications and allows for immediate foot traffic. Can also be used in a double bond installation to install cushioned underlayments for resilient flooring applications. VOC: < 1 g/L.

**WARNING:** Cancer - www.P65Warnings.ca.gov. See P. 21, *Prop 65 - 1.*

**Working Time:** Up to 3 hr.  **Tack Time:** Up 20-30 min.

**ROBERTS 7500 Vinyl Seam Sealer** is a strong adhesive designed to economically seal seams of both residential and commercial vinyl sheet flooring. VOC: 23 g/L.

**Coverage:** Up to 144 lineal feet per 8 ounces  **Working Time:** Up to 15 min.
### 2310 Resilient Flooring Adhesive

**SUPERIOR**
- Ideal for fiberglass-backed sheet vinyl and luxury vinyl tile
- Permanent or releasable installations
- Pressure sensitive; remains tacky
- Traffic - Residential / Light commercial

ROBERTS 2310 is formulated with the desired tack and flexible working time for fiberglass-backed sheet vinyl and luxury vinyl tile; heterogeneous sheet vinyl and modular carpet. VOC: < 1 g/L.

**PERMANENT (Wet-set Method)**
- **Open Time:** Up to 25 min.

ROBERTS 1660 LOCKDOWN is a pressure sensitive engineered wood flooring adhesive formulated to reduce hollow spots. ROBERTS 1660 will cure with a persistent and permanent bond. This adhesive has high solids, which allows for excellent trowel ridge holding for optimal contact. VOC: < 1 g/L.
ROBERTS 1407 is an acrylic urethane adhesive designed for the installation of engineered (up to 5” wide) wood flooring providing long term performance. Smooth and easy to trowel formula with great green strength for flooring placement. VOC: 2 g/L.

Open Time: Up to 20 min.  Working Time: Up to 30 min.

ROBERTS 1540 is a single step, 100% solids moisture-cure polyurethane adhesive formulated to bond engineered wood, solid wood and bamboo flooring. ROBERTS 1540 provides moisture vapor emissions control on concrete slabs (up to 20 lbs. MVER or 90% RH); once cured the adhesive forms a water-resistant membrane. It also bridges non-structural cracks in concrete (up to 1/8”). This adhesive is suitable for use with radiant heat systems. VOC: < 1 g/L.

Working Time: Up to 120 min.  Initial Cure: 8-10 hrs.  Final Cure: 12 hr minimum

ROBERTS 1520 is a single component, moisture-cure urethane adhesive formulated to bond engineered wood, solid wood, teak and bamboo flooring. ROBERTS 1520 has good upfront green grab and develops a permanent bond and remains flexible to withstand expansion and contraction of the flooring without stressing the adhesive. Once adhesives is cured, it is unaffected by moisture. VOC: 30 g/L.

Open Time: Up to 60 min.  Cure Time: 4-12 hrs.

1404 Wood Flooring Adhesive

**Primary**

- High solids formula with low moisture content
- Excellent initial grab and great trowel ridge holding
- Remains flexible and moves with the flooring

ROBERTS 1404 is an adhesive specifically designed to adhere 3-, 5- and 7-ply engineered wood flooring and pre-finished parquet. It develops an excellent initial tack to assist in holding boards in place during installation which makes installation easier. It remains flexible and moves with the wood as it reacts to environmental changes. VOC: < 1 g/L.

**Open Time:** Up to 15 min.  **Working Time:** Up to 40 min.

1406 Tongue & Groove Adhesive

**Superior**

- Exceptional bond strength and fast drying; applies white and dries clear
- Meets the specifications of ANSI/HPVA Type II/D3

ROBERTS 1406 is a high strength PVA adhesive with specialized applicator tip for precise placement of the adhesive. VOC: < 1 g/L.

**Coverage:** Up to 400 lineal feet per pint.  **Assembly Time:** Within 5 min.  **Drying Time:** 12-24 hrs.

10-33 Universal Putty Repair Kit

- Quickly repair scratches, cracks and other damage on wood floors, vinyl floors and counters, wood cabinets, moldings and furniture
- Easy to sand, accepts top coat finishes and stainable
- Five (5) colors to custom mix and create unlimited shades to match any project
- List of color formulas available at www.robertsconsolidated.com

Wood, Laminate & Vinyl Putty

- Fills gaps, nicks and scratches on flooring
- Acrylic based putty is easy to use and fast drying
- Can be sanded, painted or stained
- Eight (8) color choices to match a wide variety of flooring

ROBERTS 2018 TACK & CRACK is a versatile fast-setting, high-strength, tack strip adhesive and crack/joint filler. It is a two-part, self-leveling polyurea formulation designed to be easily mixed and dispensed using a standard cartridge gun. ROBERTS 2018 allows for carpet to be stretched and installed in 20-30 minutes. As a filler, it self levels, will remain flexible and will allow for 10-15% movement of installed joint width. VOC: < 10 g/L.

**Working Time:** 5 min. at 0°F (18°C), 3-5 min. at 75°F (24°C)

**Tack Time:** Up to 20 min.
ROBERTS 8200 is a fast tacking aerosol construction adhesive with the versatility to be used on a wide array of substrates. ROBERTS 8200 is formulated to bond to paper, cardboard, fabric, leather, foil, fiberglass to metal, drywall, masonry, wood and a variety of other substrates. VOC: 89 g/L. EXTREMELY FLAMMABLE

NOT FOR SALE IN CALIFORNIA

Coverage: Up to 100 ft² per 12 ounce can

ROBERTS 8250 is a commercial strength floor polish for use on virtually any flooring surface – hardwood, laminate, ceramic tile, sheet vinyl, LVT/LVP, VCT, linoleum, rubber tiles. ROBERTS 8250 quickly restores luster and shine to floors. May also be used with a high-speed buffer to achieve a high gloss. VOC: 38 g/L.

Coverage: Up to 2000 ft² per gallon

ROBERTS 1331 is a high performing acrylic latex primer designed to seal porous surfaces, while enhancing and improving the bond performance of adhesives and peel and stick tiles and membranes. ROBERTS 1331 was designed to go over a variety of substrates, including cementitious, gypsum underlayment, adhesive residue, exterior decks, and well bonded epoxy coating. VOC: < 1 g/L.

Coverage: Up to 400 ft² per gallon (over porous substrates)

Drying Time: 30-60 min; varies with temperature and humidity
**5900 Ceramic Tile Adhesive**

**PREFERRED**
- Premixed and ready-to-use
- Type I Mastic for floors and walls
- Meets ANSI A136.1 Type I and II specifications
- Spreads easily, dries fast, simple cleanup

ROBERTS 5900 Ceramic Tile Adhesive is a high performance, ready-to-use, Type I Mastic for installing ceramic, porcelain, natural stone, quarry and mosaic tile on floors and walls. It may be used for countertop, backsplash and shower wall installations, too. It spreads effortlessly, sets quickly and is easy to clean up. VOC: 1 g/L.

**WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov. See P. 21, *Prop 65 - 3.*

Open Time: 20-35 min.  
Working Time: 20-35 min.  
Drying Time: 24 hrs.

Construction Adhesive

30 DRYWALL, PANEL & FOAM Adhesive

- Strong, immediate grab for easy installation
- Provides a permanent bond to minimize nailing and nail pops
- Smooth and simple cartridge gun application
- Quick and effortless clean-up with water
- Non-solvent formula

ROBERTS 30 DRYWALL, PANEL & FOAM Adhesive is specifically formulated for the interior installation of drywall, paneling and foam board. This premium-grade construction adhesive provides immediate grab with good tack for accurate placement and a permanent bond, reducing the need for nailing and preventing nail pops. VOC: <1 g/L.

The trowel notches shown are those typically recommended for the type of wall/flooring products being installed. They are normally the minimum size recommended. Consult wall / flooring manufacturer for their specific trowel recommendation. Surface conditions (roughness and porosity of surface/substrate) type of product and backing of product will ultimately determine the required trowel notch size and coverage.
Proposition 65 is a California regulatory law that requires businesses to notify California consumers about specific chemicals in the products they purchase so they can make informed decisions about protecting themselves from exposure to these chemicals. This law requires that all companies properly label products that contain chemical(s) above certain threshold levels.

As part of Q.E.P. Inc.'s continued best business practice and compliance program, we will continue to comply with the Proposition 65 warning requirements and provide the product-associated warnings as part of our ongoing effort to comply with the law. We are dedicated to meeting consumer product safety requirements applicable to our products and strive to provide high quality and safe products.

For more information on California Proposition 65, go to www.P65Warnings.ca.gov.

*Prop 65 - 1. **WARNING**: This product can expose you to chemicals including Acrylonitrile, which is known to the State of California to cause cancer.

*Prop 65 - 2. **WARNING**: This product can expose you to chemicals including Carbon Black and Titanium Dioxide, which are known to the State of California to cause cancer.

*Prop 65 - 3. **WARNING**: This product can expose you to chemicals including Quartz and Styrene, which are known to the State of California to cause cancer and Methanol, which is known to the State of California to cause birth defects or other reproductive harm.
