INFORMATION

Designed with the professional installer in mind, the ROBERTS[®] Power-Lok[®] Extendible Floor Roller is a "must have" for installing sheet vinyl, VCT and linoleum. Spring-loaded metal collar locks and extends / retracts length quickly (in seven fixed-lock set options) from 17" to 27". Ergonomic, non-slip TRP handle is comfortable for extended use. Roller features recessed hardware to protect against damage to floors or walls while segmented rollers provide even pressure and maximum transfer of adhesive to the floorcovering for a finished look that is smooth and level. The smooth metal handgrip above rollers leverages body weight for improved control and increased pressure.
